St Rose's

St Rose's is the organisational name in which St Rose's Special School, St Martin's College and Residential Care sits within, working on the same site and sharing some facilities.

St Rose's School

St Rose's offers education to children and young people in early years (ages 2–5); main school (ages 5-16) and sixth form (ages 16-19). We believe in education without barriers and, accordingly, each child/ young person follows an individual curriculum that is adapted and modified to suit their needs. This is delivered in a range of facilities, some of which are dedicated to the specific provision, and some that are shared. Students also benefit from partnerships with other providers (including mainstream schools and FE colleges).

Staff across the organisation are committed to helping every student learn and achieve; they seek to provide opportunities that allow each to be challenged to develop their full potential and acquire their own sense of independence. A key aspect of St Rose's provision is the way that staff work 'seamlessly' together to refine their approach with each student. Our curriculum provision is constantly being evaluated and student progress monitored so that we can be confident that we are providing the best experience for each child/ young person. ICT (information communication technology) provides an important range of tools to support this, and staff are skilled in helping students learn to use assistive technologies to maximise their learning and progress.

Student progress and achievement is shared with parents and professionals (where appropriate) in a range of ways including Individual Plans (a document combining an Individual Education Plan and an Individual Therapy Plan); care plans; person-centred annual review meetings; parents' consultations, written reports and a home-school communication book. Parents and carers play an important part in helping their son/ daughter to achieve their potential and are encouraged to be in regular contact with staff so that the changing needs of each young person can be addressed. A parents' forum and focus group both offer important channels of communication.

St Martin's College

At St Martin's our aim is to develop the skills and knowledge our students need for the future so that they can lead fulfilling lives in their long-term destinations and our personalised approach ensures our students prepare for adulthood and achieve as much independence as possible.

There is a strong focus at St Martin's on making the college experience an enjoyable one whilst enabling our students to develop life skills and independence. We want them to benefit from everything on offer and our activities are student led whenever possible.

Residential care

Being away from home is a big challenge and we strive to create an environment that reassures children and young people by working closely with their families and carers prior to them staying. They are confident that their needs will be met in a family-oriented setting, where everyone is valued.

Residential students and their families have the added reassurance of daily nursing support.

The dedicated, caring and highly trained staff at St. Rose's and St Martin's work closely together, endeavouring to provide new activities and opportunities to inspire the children and students to achieve their optimum level of participation and independence. They are encouraged to take responsibility and be involved in their care programmes at whatever level is appropriate to them. We provide person-centred programmes where individual needs guide the specialist support the students receive.

Students are able to use the excellent onsite facilities during their residential stays. These include the hydrotherapy pool, sensory garden; use of a full-sized trampoline for rebound therapy to name but a few. The grounds are extensive and wheelchair accessible, allowing students to enjoy the outdoors whenever they want to.
